Standard colours shown are indicative only. Additional finishes and special requirements are quoted separately.

HOW TO MEASURE YOUR GARAGE OPENING

Measure each point in millimetres and note the smallest clear dimension where applicable.

Check the floor level and measure diagonals to confirm the opening is square.

HOW TO MEASURE

- 1 Opening width**
Measure across the top, middle and bottom. Record the smallest clear width.
- 2 Opening height**
Measure floor to underside of lintel on both the left and right sides.
- 3 Side room**
Measure clear wall space on both sides to the nearest obstruction.
- 4 Headroom**
Measure above the opening to the lowest beam, pipe, ceiling or obstruction.
- 5 Check the opening**
Record floor slope, tapers, notches, jambs, pelmets and any steel required.

DOOR SIZE GUIDE

Width: opening width + minimum 25mm each side | Height: opening height + 30mm

Example: a 2100mm opening height generally requires a 2130mm high door. Confirm before ordering.

MINIMUM CLEARANCES - GUIDE ONLY

SIDE ROOM

125mm standard

150mm low headroom

HEADROOM

290mm standard

200mm LHR front mount

REAR MOUNT

150mm headroom

Confirm site conditions
